 - ii. Follow the steps mentioned in Case 1 to update the Country of Origin (step iii will not be applicable for you)
 - iii. Once you Update the Stock and publish, the catalog ownership will transfer to you.

Important Note for OEMs: As an OEM of a brand on GeM, you are responsible for maintaining the correctness of the details of the catalog selling under your brand name on GeM. Correctness includes product specifications, descriptive attributes, images, supporting documentation, MRP and now Country of Origin with Domestic value addition (Local Content %) as well. The GeM Sanitisation team is constantly monitoring the products on offer on GeM, and any products having wrong information will be sanitised and a Show Cause will be issued to the OEM if present. All catalogs uploaded by you on GeM as an OEM will be visible on your seller dashboard. However there will be cases where your brand was already present on GeM before you claimed OEM rights, and some sellers may have uploaded various products under the brand. These products will not be visible on your seller dashboard, unless you have also paired with them.

1. To view these products, you will need to navigate to My Account → OEM Panel. Locate the category and brand you are interested in under the OEM Actions list and click on Manage Catalogs in the last column:

- a. To keep the product active on the market (and to update Country of Origin if your reseller has approached you), click on Pair. You will need to provide the Country

of Origin and update. The product will now be visible under the Published list on the seller dashboard. The catalog ownership will transfer to you.

- b. You can also click on Discontinue to take the product off the GeM marketplace completely. Please note that this is to be done only if the product is at end of life or has wrong details.
 - i. If you are not interested in selling the product yourself, you can keep your stock as 0. You do not need to discontinue the product in this case.
