

Procuring MeitY empanelled Cloud Services through GeM

Overview

The term “cloud” often gives cloud computing a somewhat mystical connotation. In reality, it isn’t all that different from traditional computing architecture.

What is Cloud Computing?

Cloud computing still relies upon the same physical server hardware that forms the backbone of any computer network. The difference between traditional computing architecture & Cloud architecture is that it makes the processing power and storage capacity of that hardware available over the internet providing its monetary and non-monetary benefits to the users.

What are the key advantages of Cloud Computing?

- Scalability
- Increased flexibility
- Lowered Costs

Solutions as per user needs, while obviating the need for procuring licenses and making large capital expenditure upfront on IT infrastructure.

Overview

How to procure Cloud services for Government Organizations in India?

In order to assist the Government Organizations in selecting appropriate Cloud services from the plethora of offerings of CSPs (Cloud Service Providers), the common IT requirements of Government Organizations were identified, and empanelled a list of 34 Cloud services, which are, to a reasonable extent, standardized across all CSPs.

Cloud Services Bouquet- Helping Government Organizations Select Appropriate Cloud Services:

These 34 cloud services have been published by MeitY as part of the Cloud Bouquet which is also available on the website of MeitY.

The 34 Cloud services, listed under Meity Empanelled Cloud Services section, have been categorized into “Basic Cloud Services”, “Advanced Cloud Services” and “Managed Cloud Services” on GeM.

Framework for procurement of Cloud Services (1/3)

The Ministry of Electronics and Information Technology, Government of India empanels Cloud Service Providers (CSPs) and Cloud Service offerings that Government Buyers can procure under three different Cloud Deployment Models namely, Public Cloud, Virtual Private Cloud (VPC) and Government Community Cloud (GCC).

This empanelment provides Buyers the assurance that these Cloud offerings from the empanelled CSPs are compliant with the IT Act 2000 and meet the latest security requirements of government, including the assurance that the data of government departments will reside within India.

List of Cloud Service Providers whose services are currently empanelled by MeitY is available on MeitY's website: <https://www.meity.gov.in/content/gi-Cloud-meghraj>

Framework for procurement of Cloud Services (2/3)

Guidelines for Procurement of Cloud Services:

The Cloud services listed under the “Basic Cloud Services” are mandatory for all CSPs empanelled by MeitY to offer to Government Organizations. The Cloud services listed under the “Advanced Cloud Services” category are optional for the CSPs to offer. All Cloud services listed in MeitY’s bouquet can now be procured by any government department through GeM. The Cloud Services Bouquet published by MeitY is available on MeitY’s website along with the guidelines for buyers to procure said cloud services.

Excerpts from MeitY’s Cloud Bouquet document:

“Cloud services, under both the categories (Basic and Advanced), are to be listed on the Government eMarketplace (GeM) platform once they have been successfully empanelled by the MeitY. If a CSP wants to list Cloud services, which are not covered under this document, it needs to follow the due process specified by MeitY to get its services first empanelled with MeitY under the “Advanced Cloud Services”.

Framework for procurement of Cloud Services (3/3)

MeitY has also set the eligibility criteria for Managed Service Providers to offer services through GeM.

The Terms and Conditions and Penalties w.r.t. procurement of Cloud services mentioned in the guidelines are automatically included as the Special Terms and Conditions in the bid document and contract when any Cloud bid is published on GeM.

Any Cloud related procurement need of Buyers that is compliant with MeitY's guidelines can now be procured as a service through GeM.

Providers Offering
Cloud Services
through Government
e-Marketplace (GeM)*

Buyer will need to login to their GeM account to procure Cloud services.

The screenshot shows the GeM login interface. At the top, there's a dark blue header with the GeM logo and navigation links for 'Bids' and 'Sign Up'. Below the header, a white banner prompts users not registered to sign up, with buttons for 'Register as Buyer' and 'Register as Seller'. The main content area has a dark background with a shopping cart image. On the left, there's a 'Need help with your Login?' section with links to 'Raise a Ticket' and 'Contact Us'. On the right, a white login box titled 'Login in to Government e Marketplace | GeM' contains a 'GeM User Id' field, a captcha field with the text 'WQKSFG', and a 'Submit' button. A green callout bubble points to the 'Submit' button.

Click on 'Market' and from the dropdown menu, click on 'Services' to check out the list of services available

The screenshot displays the GeM website's header and main content area. The header includes the GeM logo, navigation links (Dashboard, Market, Bids, Purchase Requisitions), and a user profile (Akhir Jindal). A red arrow points to the 'Market' dropdown menu, which is open, showing 'Products', 'Services' (highlighted with a red box), and 'Air Ticket Booking'. Below the header, there is a 'CATEGORIES' section with a search bar. The main content area features a 'NOTIFICATIONS' banner for 'POSHAN ABHIYAAN' with an 'Explore Now' button. Below this, there is a section titled 'POSHAN Abhiyaan Categories' with a row of product images. An 'Ask GeMmy' button is visible in the bottom left corner.

Select 'MeitY Empanelled Cloud Services (Basic, Advanced & Managed).'

The screenshot shows the GeM website interface. At the top, there is a dark blue header with the GeM logo, the text '75 Azadi Ka Amrit Mahotsav', and links for 'Bids', 'Login', and 'Signup'. Below the header is a navigation bar with a 'CATEGORIES' menu and a search bar. The search bar contains the text 'meit'. A dropdown menu is visible, showing the selected item: 'MeitY Empanelled Cloud Services (Basic, Advanced & Managed)'. Below the search bar, there are buttons for 'BACK', 'LIST', and 'GRID'. The 'LIST' button is highlighted. The main content area displays a list of services. The first service is 'Advertisement Service'. The second service is 'AMC / CMC OF FIRE FIGHTING EQUIPMENTS'. The third service is 'Annual Maintenance Contract For Networking Devices'. Each service card has a 'SHOW DETAIL' button at the bottom. A green callout box with an arrow points to the search bar, containing the text: 'Search for the service by typing in the keywords here.'

List of all services under the Service Category selected by you can be viewed here.

Meity Empanelled Cloud Services (Basic, Advance & Managed)

Cloud has established its monetary & non-monetary benefits. Government Organizations cannot afford to miss on-boarding the Cloud bandwagon if they want to deliver their services to businesses and consumers resourcefully. However, Cloud Service Providers (CSPs), operating in India, have been offering differing and proprietary Cloud services, and it is very difficult for Government Organizations to compare and select Cloud services that can meet their business and IT requirements.

The Cloud services offered by the global and domestic CSPs vary significantly even if the services are intended to cater to the same requirements of the Government Organizations. The input parameters required to procure the Cloud services and the measurement / monitoring criteria used to bill the service consumers also vary greatly.

In order to assist the Government Organizations in selecting appropriate Cloud services from the plethora of offerings of CSPs, the common IT requirements of Government Organizations were identified and an attempt has been made to prepare a list of Cloud services, which are, to a reasonable extent, standardized across all CSPs. Though it is not possible to make an apple to apple comparison between Cloud services offered by various CSPs, the intent of providing this bouquet of Cloud services is to make Government Organizations aware of the common Cloud services which are being offered by the empanelled CSPs and which can be compared, to a reasonable extent, across all CSPs, before taking the decision to procure a Cloud service from a particular CSP.

SEE DETAIL

Select the relevant offering to proceed.

Assuming you want to procure cloud services for a human resource management system for which you need a Web application server and a database both for Data Centre (DC) and Disaster Recovery (DR), for this you need to create a bunch bid with two services:

Managed Database as a service which is listed under both Basic as well as Advanced Cloud Services with different specifications, thereby giving Buyer the option for selecting a database with the desired specifications. For eg: If you want to opt for a particular SQL database, you must select Managed Database as a Service listed under Advanced cloud services. Every unique configuration of the service is to be added separately as a line item to the cart.

Assuming you want to procure cloud services for a human resource management system for which you need a Web application server and a database both for Data Centre (DC) and Disaster Recovery (DR), for this you need to create a bunch bid with two services:

If you want to procure one virtual machine and one database for your main data centre DC and also want the same configuration for disaster recovery, you may specify the required quantity as 2 Virtual Machine and 2 Database. However, if the configuration is different for Data Centre (DC) and Data Recovery (DR), then the specifications for DR will need to be defined separately. Either 2 or 4 line items shall be added to your cart before you further proceed with the bid creation process.

Add the next Cloud service in the cart (bunching) and define its specifications. Let us see how Bunch bids are created:

The Cloud services offered by the global and domestic CSPs vary significantly even if the services are intended to cater to the same requirements of the Government Organizations. The input parameters required to procure the Cloud services and the measurement / monitoring criteria used to bill the service consumers also vary greatly.

In order to assist the Government Organizations in selecting appropriate Cloud services from the plethora of offerings of CSPs, the common IT requirements of Government Organizations were identified and an attempt has been made to prepare a list of Cloud services, which are, to a reasonable extent, standardized across all CSPs. Though it is not possible to make an apple to apple comparison between Cloud services offered by various CSPs, the intent of providing this bouquet of Cloud services is to make Government Organizations aware of the common Cloud services which are being offered by the empanelled CSPs and which can be compared, to a reasonable extent, across all CSPs, before taking the decision to procure a Cloud service from a particular CSP.
